OBJECTIVES :

Analytical B.Tech in AI and Data Science graduate with proficiency in data structures, C, C++, and Python. Skilled in web development, scripting, and competitive programming. Knowledgeable about data analysis and machine learning. Combining technical accuracy with narrative to tackle challenging issues and inspire creativity.

SKILLS :

- Programming: Python, Java, C++, C
 - Web: HTML, CSS, JavaScript, MERN Stack
 - Database: DBMS, MySQL
 - Tools: n8n, UI/UX Design
-

EXPERIENCE :

1.As a Freelancer :

Having 6+ months of freelance experience in software and application development
Successfully completed 6–10 client projects with customized solutions
Worked on coding, debugging, and project optimization based on client requirements

2.As an Intern :

Developed and optimized basic applications using Python and C++, focusing on problem-solving and efficient code implementation.
Worked on debugging, testing, and improving program performance while learning software development best practices in a team environment.
Collaborated on mini-projects and coding tasks, gaining hands-on experience in object-oriented programming, data structures, and logical thinking.

EDUCATION :

B.Tech – Artificial Intelligence and Data Science
KIT - KalaignarKarunanidhi Institute of Technology, Coimbatore
CGPA: 8.92
Expected in 01/2028

PROJECTS :

Direct Property - Tech Stack : MERN Stack

Built a property management system to handle listings, ownership, and transactions . Designed efficient backend logic for data management and workflow automation . Ensured data consistency, security, and smooth user operations.

Student Performance Tracker : Tech Stack - (Python , Stream lit , kaggle Datasets)

Developed a machine learning model to analyze and predict student performance . Performed data preprocessing, visualization, and model training . Provided insights to support academic improvement decisions.

Data Guarding : Tech Stack - (NEXT.JS)

Developed a secure agricultural data management system to replace manual record-keeping . Improved data integrity, automation, and workflow efficiency for farmers and stakeholders . Designed structured storage and retrieval for reliable data handling.

Data Securer : Tech Stack - (MERN STACK + Blockchain)

Designed a system to ensure secure storage and protection of sensitive data . Implemented data integrity checks and basic encryption techniques . Focused on reliability and security in data handling processes

Recipe Bot : Tech Stack - (HTML , CSS , JavaScript)

Built an ingredient-based recipe recommendation system with a user-friendly interface . Implemented personalized suggestions using efficient dataset handling . Integrated frontend and backend for seamless user interaction.

CERTIFICATIONS :

- | | |
|--|------------------------------------|
| - Problem Solving in C – NPTEL | - DBMS – NPTEL (ELITE) |
| - HTML, CSS, JavaScript – Coursera | - Python Essential (1 & 2) – CISCO |
| - Operating System Foundations – CISCO | |
-

ACCOMPLISHMENTS :

- Achieved Division 3 ranking on CodeChef
 - Secured 1400+ rating on CodeChef and LeetCode
 - Ranked Top 15 among 400+ students in college-level competition
 - Solved 1000+ problems across rated coding platforms
 - Participated in 80+ global competitive programming contests
-

DECLARATION :

I hereby declare that the information provided in this resume is true and accurate to the best of my knowledge.
